

EXPRESSION OF INTEREST REQUIREMENTS

CANE ACCEES ROAD CONSTRUCTION, REPAIRS AND/OR MAINTENANCE 2019/2020

A. BACKGROUND

Given that the majority of cane is supplied to the mills via lorries it is critical that cane access roads be in trafficable condition during the crushing season in order for the mills to receive the amount of cane required daily for crushing. Therefore, there is a need to upgrade and maintain cane access roads for consistent supply of cane to the mills and also to ensure that mill stoppages due to a lack of cane are minimized.

B. SCOPE OF WORK

Fiji's Cane Farm Access Roads are typically short, gravel/earthen roads and located within and around all the cane districts.

The scope of work involves using Graders, Diggers and Bulldozers to:

- (a) run blade and remove all debris and grass from site;
- (b) level road;
- (c) cut side drains along the road and ensure that drains have adequate water run ways; and
- (d) Re-sheet with 65mm down river gravel – not river boulders or sand.

C. REQUIREMENTS

Interested companies are requested to submit the following documents and information to allow a thorough assessment of their submissions.

Companies will be assessed on their financial, operating status, qualifications, equipment owned that would be available, experience held, level of interest in such projects, past performances in similar role and other general requirements under the FSC Contractual Agreements set out overleaf

COMPANY/ BUSINESS ID
